Chorus

Baby you're like whiskey, I know I shouldn't have it all
But you make me feel some type of way, then make me forget it all
And you slide down easy, then you put me in my place
Never would've guessed you were the one to make me go without a chase
Baby you're like whiskey

All of you goes through my head, was it something that you said?
Never thought that I'd find you, I never thought that I'd find you
I want you all to myself, baby girl you are top shelf
Never thought that I'd find you

Chorus

Baby you're like whiskey, I know I shouldn't have it all
But you make me feel some type of way, then make me forget it all
And you slide down easy, then you put me in my place
Never would've guessed you were the one to make me go without a chase
Baby you're like whiskey

You light me up like fireworks, we get close and feel the burn
Never thought that I'd find you, I never thought that I'd find you
When you came into my heart, I drank it up now here we are
Never thought that I'd find you

Chorus

Baby you're like whiskey, I know I shouldn't have it all
But you make me feel some type of way, then make me forget it all
And you slide down easy, then you put me in my place
Never would've guessed you were the one to make me go without a chase
Baby you're like whiskey

Chorus

Baby you're like whiskey, I know I shouldn't have it all
But you make me feel some type of way, then make me forget it all
And you slide down easy, then you put me in my place
Never would've guessed you were the one to make me go without a chase
Baby you're like whiskey
